

Three Steps for 2022 ICF Events

Gather

Travel information for all (athletes, staff, volunteers, officials, guests, media, partners and HOC workforce)

Electricity and boat fuel use to be shared by organisers.

Calculate

Starboard team use the information shared to calculate the total CO2 emitted using CO2 emission factors.

Plant

Mangroves and 'Blue Carbon' are the most effective at absorbing and storing CO2. 1 mangrove is planted for each 1 tonne identified.
